

BitgertSwap: An Introduction

BitgertSwap is a decentralized exchange implemented via non-upgradeable smart contracts on Bitgert Blockchain. It provides the features of Swapping, an automated liquidity protocol and you get rewarded every time you use BitgertSwap.

Benefits for users who uses BitgertSwap

The prime feature which makes Bitgert Swap stand apart from other existing crypto swapping platforms (DEXs) is that for every transaction, user is rewarded with BTS token worth 0.5% of the transaction value. User can see the reward earned in the reward column, can easily claim it after 45 calendar days.

N.B: 0.5% may vary depends on tax of the token and spillage given

Benefits for project owners who adds their token to Dex

In BitgertSwap there is reward for everyone, even for project owners who adds their token to our DeX. From the total supply of BTS token, 10% will be reserved specifically for rewarding such project owner based on the volume of token added. The owner can start claiming theirs after 6 months.

About BTS(BITGERT SWAP TOKEN)

The BTS token will be minted with an initial supply of 1 billion, out of which only 40% will be allocated to Dex to start with. The token will thus have an initial liquidity of \$20,000. Out of the total Dex revenue, 10% of Dex will be added to the liquidity. This will be used for Buy Backs and burns of BTS token.

For buying, selling and transferring BTS, a flat tax of 12% will be deducted from the total value. Out of this collected tax value, 4% is used for adding liquidity and the remaining 8% goes to the treasury, which will be in turn used for further development and advancement of the Dex.

NB:-If you swap BTS to brise, no further reward will be provided.

DEX Fees :-

The Dex charges a nominal fee of 0.4% on every transaction.

Upcoming features of DEX

BitgerSwap has a team of dedicated developers who are working innovative way to help mainstream crypto. Some of the upcoming features include Farming, liquidity locking and pools with cross-chain support, which will be live very soon.
